Thank you, Karen.

I look forward to staying in touch with you regarding technical challenges we face on some of the other projects that we discussed.

Warm regards,

- Carol

Carol,

I spoke with Jim Haklar. It seems like the best way to move forward is for your team to continue developing your proposal and working with Jim and the state to modify the ROD. If you have questions about possible technologies, feel free to email me (cc Jim) and I will work with our team to get you answers if possible. Otherwise, I don't think we have any issues to discuss in a meeting, as technical questions are best answered by email and site-specific questions are best directed to Jim. Thanks for getting in touch and educating Amanda and I about the site.

Best Regards,

Karen Swetland-Johnson, Ph.D.
